ANNUAL TRAINING PRODUCT DEVELOPMENT PLAN

2024

Annual Training Product Development Plan

Industry Skills Australia (ISA) is a Jobs and Skills Council funded by the Australian Government Department of Employment and Workplace Relations. We produce the Annual Training Product Development Plan to provide a summarisation of the planned training product development activities for 2024. This includes the industry need for the work, the scope of work to be undertaken and the reasoning for the prioritisation. All projects will be undertaken in accordance with the requirements of the [Training Package Organising Framework](#).

Aviation Rescue

Project Detail: The Australian government and the Australian Maritime Safety Authority (AMSA) contract operators to protect Australia's borders and also conduct search and rescue missions to save lives. These operations cover a vast geographical surface of 52.8 million kilometres and missions are conducted by aircrew and rescue officers in both rotary and fixed wing aircrafts in both civil and defence contexts.

Currently the existing qualifications AVI30519 - Certificate III in Aviation (Rescue Crew Officer) and AVI40119 - Certificate IV in Aviation (Air Crew Officer) are skewed towards rotary aircraft. Existing packaging rules and the content of the Units of Competency make it impossible to attain competency in either fixed wing or a non-defence context in which the missions can be conducted.

The project review will seek to enhance the qualifications usability across multiple sectors including State Emergency Services and other specialist emergency services using fixed wing aircraft. The review will also identify redundant units of competency. The review provides the opportunity for air crew and rescue crew officers who work on fixed wing aircraft to attain a nationally recognised qualification and boost career progression and workforce mobility in closely associated sectors.

Training Product Priority

Routine
The project is in response to industry needs to enhance the recognition of VET qualifications and ensure they meet industry needs and practices. The project is a routine and requires a period of 12 months to be completed.

Scope of Training Products for Aviation Rescue

The update to the Aviation Training Package products include:

Existing Qualification/s	New Qualification/s	Existing Unit/s	New Unit/s	Existing Skill Set/s	New Skill Set/s
2	0	34	0	17	0

In addition, the units of competency are also used in the following training packages:
- DEF - Defence
- MEA - Aeroskills

Industry Skills Australia will consult with the relevant Jobs Skills and Skills Councils (Public Skills Australia, Manufacturing Industry Skills Alliance) about the updates.

Transport Security Protection

Project Detail: The Department of Home Affairs acts as the security regulator for the aviation, maritime, and air cargo sectors, setting the training and qualification requirements for security screening officers for these sectors. This project is in response to recent regulatory changes requiring screening officers to hold the AVI20118 Certificate II in Transport Security Protection for the aviation and maritime sectors. This requirement came into effect on 16 January 2022 for the aviation and maritime sectors and 1 January 2023 for the air cargo sector.

The project will review the qualification to ensure it meets regulatory requirements and has the necessary specifications to produce for competent and regulatory compliant cargo screeners.

Training Product Priority

Routine

Airport security screening is a vital part of airports' operations, and it is regulated by the Department of Home Affairs. Due to recent regulatory changes and also the reported challenges in delivering the content of this qualification, the Department has consulted training providers and industry and they have requested the need to review and update this qualification to ensure it reflect the latest security screening technologies and industry practices. The project requires a period of 12 months to be completed.

Scope of Training Products for Transport Security Protection

The update to the Aviation Training Package products include:

Existing Qualification/s	New Qualification/s	Existing Unit/s	New Unit/s	Existing Skill Set/s	New Skill Set/s

Marine Order 505

Project Detail: After a 3-year period of industry consultation, a new maritime regulation known as Marine Order 505 (MO505) (Certificates of competency – National Law) for domestic commercial vessels came into effect on 1 January 2023.

Seafarers must hold an approved Australian Maritime Safety Authority (AMSA) Certificate of competency to perform the duties required by job roles on a vessel in Near Coastal waters, which includes the achievement of a maritime training package qualification or Skill Set and units of competency.

In response to MO505, AMSA has requested that maritime training products for Near Coastal job roles be reviewed to reflect MO505 licensing and regulatory information.

These job roles include:
- General Purpose Hand
- Coxswain Grade 1, Coxswain Grade 2
- Master <100 metres, Master <45 meters, Master <24 meters
- Master Inland Waters
- Engineer Class 3
- Marine Engine Driver (Grade 1), Marine Engine Driver (Grade 2), Marine Engine Driver (Grade 3).

Training Product Priority

Routine

AMSA has confirmed this project is in response to a licensing and regulatory need and that the nominated Near Coastal broad range of job roles will require substantial public consultation and extended stakeholder engagement, which requires a period of 12 months.

Scope of Training Products for Marine Order 505

The update to the Maritime Training Package products include:

Existing Qualification/s	New Qualification/s	Existing Unit/s	New Unit/s	Existing Skill Set/s	New Skill Set/s
18	0	81	1	8	1

In addition, the units of competency are also used in the following training packages:
- AHC - Agriculture, Horticulture and Conservation and Land Management Training Package
- PUA - Public Safety
- SFI - Seafood Industry
- SIT - Tourism, Travel and Hospitality Training Package

Industry Skills Australia will consult with the relevant Jobs Skills and Skills Council/s (Skills Insight, Public Skills Australia, Service and Creative Skills Australia) about the updates.

Chain of Responsibility Regulatory Revision

Project Detail: The project requires aligning the two chain of responsibility units with the National Heavy Vehicle Regulators' (NHVR) requirements.

The two chain of responsibility units are predominately used by job roles across the transport industry for guidance in relation to the skills, knowledge and monitoring required to monitor and ensure the safety of transport activities. They include identifying and applying, chain of responsibility obligations in the Heavy Vehicle National Law (HVNL) or applicable state/territory law and regulations. They also include identifying and reporting chain of responsibility risks.

Training Product Priority

Fast Track

To ensure new participants receive up-to-date skills aligned with legal obligations, it is essential to expedite the project of revising and harmonising regulatory requirements mandated by the Heavy Vehicle National Law (HVNL) within the skills and knowledge of the Units of Competency.

Scope of Training Products for Chain of Responsibility Regulatory Revision

The update to the Transport and Logistics Training Package products include:

Existing Qualification/s	New Qualification/s	Existing Unit/s	New Unit/s	Existing Skill Set/s	New Skill Set/s
22	0	2	0	7	0

In addition, the units of competency are also used in the following training packages:
- FWP - Forest and Wood Products Training Package
- UEG - Gas Industry Training Package

Industry Skills Australia will consult with the relevant Jobs Skills and Skills Council/s (Skills Insight, Powering Skills Organisation) about the updates.
